

Marek Smatana, Ing.

Product-minded software engineer building fast React experiences, high-traffic acquisition pages, and mobile apps with clean UX.

smat.marek@gmail.com

PROFILE

I work across React, TypeScript, React Native, testing, SEO optimization, and performance. Recent work centers on Omio's organic acquisition experience, where page quality, speed, and experimentation directly affect business outcomes. Outside client work I build mobile products under Build It Studio, including Breathe It and a workout app preparing for release.

CORE SKILLS

React	TypeScript	JavaScript
React Native	Tailwind CSS	SCSS
Jest	Testing Library	SEO
A/B testing	CI/CD	GraphQL
Git		

AI-ASSISTED ENGINEERING

AI coding assistants

Daily use of ChatGPT, Codex, and Claude for development, reviews, debugging, architecture discussions, and rapid prototyping.

OpenAI API integration

Integrated OpenAI API into a React Native app to generate personalized workout plans and training insights.

Pragmatic adoption

Follows AI tooling trends and uses them to boost productivity while keeping engineering judgment and ownership of final implementation.

EXPERIENCE

CODERAMA, s.r.o. - Medior Software Engineer

Mar 2024 - Present

Omio | React, TypeScript, SCSS, React Native, Jest, Testing Library, SEO, A/B testing

- Developed and maintained high-traffic landing pages for Omio's Organic Acquisition team.
- Implemented and evaluated A/B experiments focused on acquisition, engagement, and conversion rates.
- Improved automated test coverage from a low baseline to over 80% while reducing technical debt.
- Optimized Core Web Vitals and diagnosed hydration issues, browser-specific rendering problems, and production defects.

Sudolabs - Medior Software Engineer

Jul 2022 - Mar 2024

Finviz | React, TypeScript, JavaScript, C#, ASP.NET Razor Pages, MSSQL

- Worked on a widely used financial market analysis platform for screening, visualization, charting, and trading workflows.
- Modernized legacy code, implemented new charting functionality, and improved maintainability and scalability.
- Developed and maintained frontend and server-side components, including database-related support when required.

EXPERIENCE CONTINUED

Sudolabs - Medior Software Engineer

Apr 2022 - Jul 2022

GEAM | React, TypeScript, Apollo GraphQL, Chakra UI, Tailwind CSS, Storybook

- Helped build a greenfield insurance risk assessment application for UNIQA.
- Contributed to frontend architecture, reusable foundations, table editing, validation, state management, exports, and GraphQL integration.

Quest Software - Junior JavaScript Developer

Nov 2021 - Mar 2022

Internal web applications | AngularJS, React.js, JavaScript

- Built and maintained user interfaces for internal web applications using AngularJS.
- Reworked React.js code into AngularJS and collaborated with globally distributed engineers.

UNICORN Slovakia - Junior JavaScript Developer

Mar 2021 - Nov 2021

Internal web applications | React.js, JavaScript, unit testing

- Built internal web application interfaces and wrote server-side JavaScript based on prepared documentation.
- Created full unit test coverage for newly delivered code.

OWN PRODUCTS

Breathe It - Published mobile app

Guided breathing app focused on calm, focus, and relaxation through simple sessions, visual and audio guidance, customizable durations, and saved favorites.

React Native | Wellness | Mobile UX | Product design

buildit.studio/breatheit

Workout app - In development

Mobile training product designed around practical workout flows, useful progress feedback, personalized workout plans, and training insights.

React Native | Fitness | OpenAI API | Launch prep

EDUCATION

University of Žilina

Faculty of Management Science and Informatics

Ing. - Engineer's degree | 2017 - 2021

STRENGTHS

Frontend delivery

Maintainable React and TypeScript interfaces with readable architecture and reusable UI.

Growth engineering

High-traffic SEO pages, A/B experiments, Core Web Vitals, and conversion-focused product work.

Product ownership

Comfortable shaping features from discovery through implementation, testing, release, and production follow-up.

WORK STYLE & PERSONALITY

I do not run from challenges. I like difficult tasks, breaking them down with team, and seeing them through responsibly. I enjoy teamwork, open communication, and sharing context so the team can move faster together. People can rely on me to follow through, be prepared, and care about the quality of what I deliver.

Outside work, I enjoy listening to rock and power metal like Kabát, Avantasia and Sabaton, I love playing modded Minecraft, Terraria and Megabonk.

In my free time I build side projects where design, calm UX, and practical utility meet.
